

UNIVERSITY OF CENTRAL LANCASHIRE

Programme Specification

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided.

Sources of information on the programme can be found in Section 17

1. Awarding Institution / Body	University of Central Lancashire
2. Teaching Institution and Location of Delivery	Hugh Baird College
3. University School/Centre	School of Arts and Media
4. External Accreditation	N/A
5. Title of Final Award	Foundation Degree in Interior and Spatial Design
6. Modes of Attendance offered	Full-Time / Part-Time
7. UCAS Code	D3C8
8. Relevant Subject Benchmarking Group(s)	Foundation Degree qualification benchmark (2010) http://www.qaa.ac.uk/Publications/InformationAndGuidance/Documents/Foundation-degree-qualificationbenchmark.pdf Art & Design (2008) http://www.qaa.ac.uk/Publications/InformationAndGuidance/Documents/ADHA08.pdf
9. Other external influences	N/A
10. Date of production/revision of this form	September 2017 Updated October 2020 (FYE added)

11. Aims of the Programme

- To widen and increase participation in higher education by delivering vocational knowledge and skills needed for employment through work-focussed learning.
- To facilitate the acquisition of knowledge, understanding and skills in relation to creative thinking and innovation in Interior Design.
- To provide students with an effective balance between education and training, by promoting self-development and creative expression, intellectual enquiry and the visual communication of ideas underpinned by the acquisition of transferable, technical and practical skills and knowledge.
- To equip students with the skills, knowledge and understanding for versatility and confidence, relevant to the needs of clients and employment in the interior design sector.
- To give students a progression route to advance, where appropriate, towards other qualifications, for example, an Honours Degree.

12. Learning Outcomes, Teaching, Learning and Assessment Methods

A. Knowledge and Understanding

- A1. Produce written work that demonstrates both historic and contemporary design knowledge relating to Interior Design Practice.
- A2. Apply research methodologies to demonstrate a wider awareness of socio economic and historical influences in interior design to underpin discussion and design thinking.
- A3. Discuss and explain the principles of how different skills techniques can be used in the design and communication of interior design concepts.
- A4. Interpret knowledge of materials, space, scale and the built environment to secure realistic design proposals.
- A5. Discuss information and digital media technologies with an awareness of capabilities and social expectations.

Teaching and Learning Methods

Across all modules and at all levels, teaching and learning are synthesised from a variety of learning activities and opportunities. Knowledge and Understanding at level 4 is characterised by a knowledge of the history and background of practice and practitioners. At level 5 knowledge and learning is characterised by a knowledge of contemporary issues in relation to design. Learning situations include:

- Lectures
- Seminars
- Group Discussions
- Practical tutor – led workshops
- Group tutorials and verbal feedback
- One – to – one tutorials
- Study visits
- Live projects
- Workshops
- Technical Inductions

Attainment of knowledge is further developed through directed study and practical exercises.

Understanding is reinforced through tutorial work using a range of design briefs to extend the student's personal practice.

Assessment methods

Assessment will focus on the application of knowledge and theory. Evidence of the development of the core contextual themes will be assessed summatively in DD1000 and DD2000. Evidence of development of other knowledge and understanding will be assessed summatively through:

- Written assessments
- Research, development and final project work
- Student portfolio
- Presentations

B. Subject-specific skills

- B1. Develop and apply a range of 2D and 3D communication skills through traditional media to communicate design ideas.
- B2. Demonstrate a range of practical and conceptual skills necessary for the realisation of successful/innovative interior design solutions.
- B3. Demonstrate the use of digitised work as a platform for the development and manipulation of technical and creative multi-media imagery.
- B4. Develop the use of models in order to realise scale, form, shape and volume and communicate design intentions.

Teaching and Learning Methods

Subject specific learning occurs within:

- Workshops
- Practical work
- Lecture/demonstrations
- Study trips
- Exhibitions
- Self-reflection and peer group evaluation
- Live / competition projects

Assessment methods

Assessment of these skills will focus on the development of techniques and development of the student's own work, particularly their ability to interpret a design brief, the level of creativity demonstrated and the range of techniques utilised as part of the portfolio of work. The following activities are used for assessment:

- Research, development and final project work
- Exhibitions
- Practical work
- Presentations
- Final work

C. Thinking Skills

- C1. Develop idea generation and creative thinking skills to problem solve appropriate challenges faced in designing interiors.
- C2. Develop thinking through drawing to problem solve and utilise spatial awareness to ensure design ideas are accessible functional and buildable.
- C3. Objectively differentiate and evaluate through both verbal and written/illustrative means in respect to the application of contemporary design practice.
- C4. Compare, analyse and critically evaluate design solutions in reference to the design

process.

Teaching and Learning Methods

Thinking skills within this course are the intellectual qualities related to cognitive ability through the acquisition of critical and contextual knowledge. The application of these qualities occurs in all teaching and learning situations and at this level these are focussed upon the application of ideas from one or more contexts using specialist vocabulary and critical language. It is expected that students should demonstrate a critical understanding of the content and ideas that exist within a wide range of works.

Assessment methods

Students will be given the opportunity to experiment and to develop confidence during creative tasks, whilst also being introduced to industry practice.

Practical teaching will encourage an independent approach with workshops and development of practical, technical and design skills.

The following activities are used for assessment:

- Practical work
- Written assessments
- Presentations
- Final work

D. Other skills relevant to employability and personal development

D1. Collect, record and discuss a range of information that will allow reflection on historical, contemporary, digital and design practice to aid in the production of future projects.

D2. Develop personal management techniques to effectively progress through project work and build awareness of employability skills.

D3. Produce a CV and creative digital portfolio that illustrates a range of skills in preparation for further study or employment.

D4. Develop independence and personal reflection in the form of producing industry ready project briefs that meets the requirements stated by the client and accompanying reflective blogs where appropriate.

Teaching and Learning Methods

The outcomes within this category relate to practical and theoretical learning as effective and relevant as possible, as such students are expected to fully participate in all learning events and to be effective group members.

Students will be given the opportunity to experiment and to develop confidence ensuring creative and imaginative tasks, whilst also being introduced to industry practice and discipline.

Practical teaching will encourage an independent approach with workshops supporting the development of practical, technical and design skills in observational sketching, 3D modelled spatial representation, multi-media presentation, computer aided design, computing skills, design rationalisation and budget awareness.

Assessment methods

Assessment will focus on the standard of practical and written work and the development of wider skills. Development will be evidenced through reference to personal development logs/journals, peer responses and tutor comments.

The following activities are used for assessment:

- Visually enriched and written log/journals

- Essays
- Presentations
- Blogs
- Pitches
- Live projects
- Personal development portfolio

13. Programme Structures*				14. Awards and Credits*
Level	Module Code	Module Title	Credit rating	
Level 5	IN2000	Interior Design Studies	40	Foundation Degree in Art Interior and Spatial Design Requires 240 credits including a minimum of 120 at Level 5.
	IN2015	Digital Solutions 2	20	
	DD2000	Design: Culture and Society 2	20	
	IN2011	Advanced Model Making	20	
	IN2013	Professional Practice	20	
Level 4	IN1015	Design for Interiors	40	Foundation Certificate Interior and Spatial Design Requires 120 credits at Level 4 or above.
	IN1016	Digital Media for Interiors	20	
	DD1000	Design: Culture and Society 1	20	
	IN1001	Drawing and Modelling 1	20	
	IN1011	Digital Solutions 1	20	
Level 3	AZC012	Art & Design Studies	20	Requires completion of 120 credits at Level 3. Successful completion of the course leads to a guaranteed progression onto Year 1 of the FdA Interior and Spatial Design. Students who exit after the Foundation Entry Year will receive a transcript of their modules and grades.
	AZC015	Design Investigation	40	
	AZC009	Specialism Skills	40	
	AZC016	Drawing and Image Communication	20	

15. Personal Development Planning

We aim to prepare and train students to take responsibility for their own learning and career development and to be able to evaluate personal strengths and weaknesses and a general key skill base: for example the use of English, literacy and writing skills, numeracy communication and the use of IT. Students will identify areas for improvement on a continuous basis as they progress through the two years.

Additional practical workshop sessions and the use of mentors and peer assessment will allow students to develop their practical skills.

Study skills support sessions on a one to one or group basis will also be offered to develop student's academic awareness and application.

Student's personal aspirations will form the basis of project work whilst working towards completion of the qualification. Collaboration with existing HE provision such as the FdA Visual Merchandising and Promotional Design course will allow for additional project briefs focusing on Work Based Learning.

Personal development planning is the result of negotiation with the year tutor at formative feedback stages. At summative feedback stages students reflect on how they have responded to strengths and weaknesses previously identified. The process aims to develop the student's design awareness and, ultimately personal design philosophy.

Students are encouraged to set up and to participate in web based activity such as blogging with the aim of developing their philosophies and sharing thoughts with others.

16. Admissions criteria

UK Applicants:

Except in exceptional circumstances, UK applicants must attend an interview with portfolio. Once your application has been processed you will be sent a letter stating the date that you are required to attend, and what will be required of you.

If it is not possible for you to attend on the date proposed, please contact us to rearrange a date or agree alternative arrangements.

All successful candidates must have achieved the following:

- A minimum of 64 UCAS tariff points
- Relevant Level 3 qualification / A Levels (grade A-C)
- Foundation Entry Design / Art and Design
- Access qualification in a related field
- Portfolio that is art or design based
- All applications should normally demonstrate satisfactory performance at GCSE level in the form of at least five passes at grade C or above to include GCSE Maths and English, equivalent qualifications may also be considered.
- Mature students may not meet the standard entry requirements but they may still be considered for a place on the course.
- **In lieu of a portfolio, applicants may complete a project as an alternative demonstration of ability.**

European Applicants:

European applicants may not be able to attend an interview in the UK. Once your application has been processed, you should submit an e-portfolio, CD or DVD of your recent work; this will be followed by a telephone interview.

Additionally, European students for whom English is not your first language, will be required to evidence an IELTS score of 6.0 or equivalent. Equivalences include:

- TOEFL Written examination score of 550 plus a test of written English (at 4)
- TOEFL Computer Equivalent score of 213 and TWE at 4

Proficiency in English (Cambridge) at Grade C or above.
